## Description:

NS-SFP-Dxx is a very compact 1.25Gb/s optical transceiver module for serial optical communication applications at 1.25Gb/s. The NS-SFP-Dxx converts a 1.25Gb/s serial electrical data stream to 1.25Gb/s optical output signal and a 1.25Gb/s optical input signal to 1.25Gb/s serial electrical data streams. The high speed 1.25Gb/s electrical interface is fully compliant with SFI specification.

The high performance DWDM COOLED DFB transmitter and high sensitivity APD receiver provide superior performance for Ethernet applications at up to 40km links.

The SFP Module complies with SFF-8431, SFF-8432 Digital diagnostics functions are available via a 2-wire serial interface, as specified in SFF-8472.

The fully SFP compliant form factor provides hot pluggability, easy optical port upgrades and low EMI emission.
